

# What's going well?

## Top 5 strengths, was Ball Possession important for Troyes?

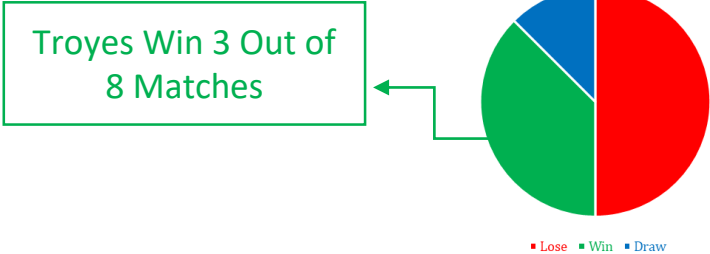

### Top 5 Troyes Strengths

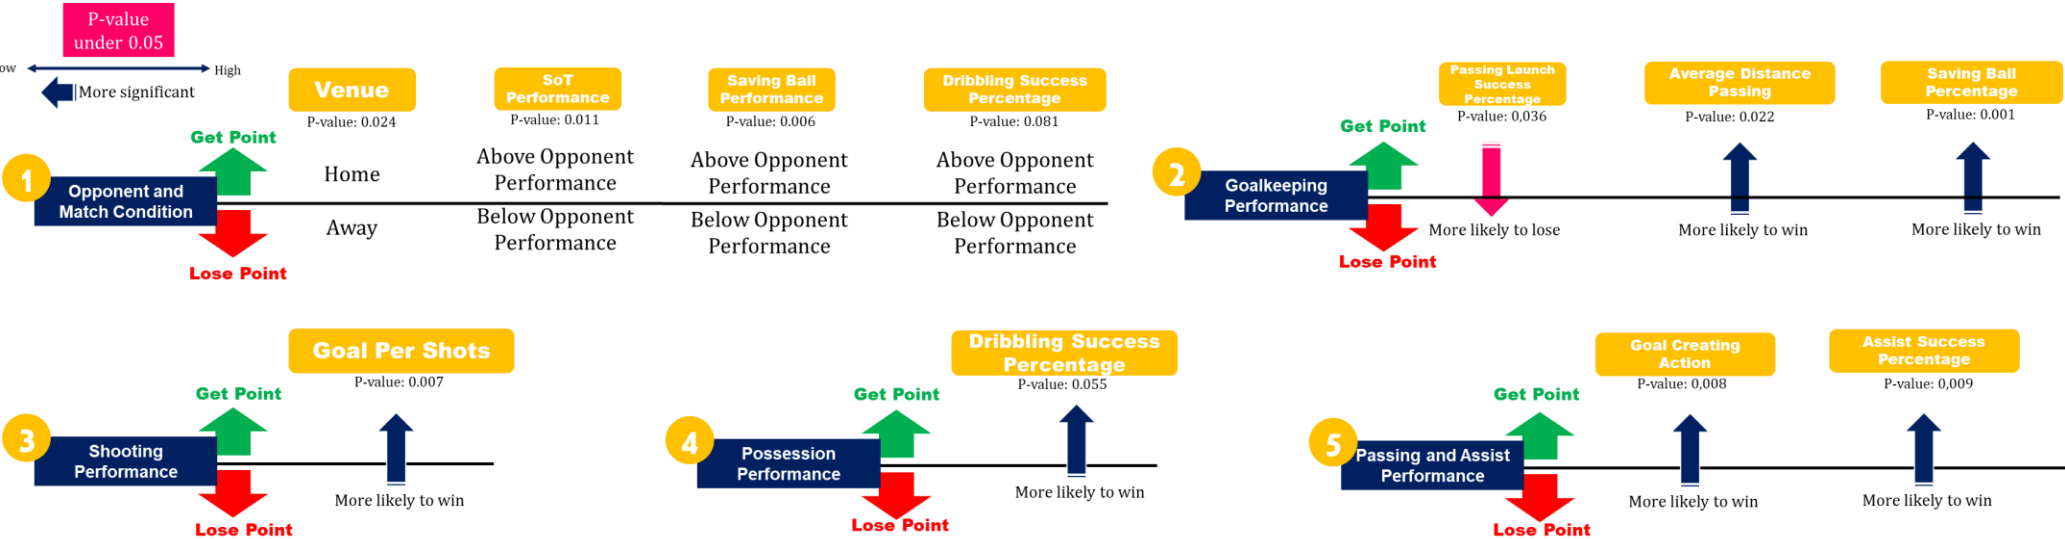

Actions	Players	Competitive Advantage (%)
Interceptions	DF	40.88
Goal Creating Actions	FW	32.98
Goal Against	GK	31.69
Crosses Stop	GK	26.25
Post-Shot Exp. Goals per SoA	GK	26.21

Compared to the average teams in Ligue 1 this season, Troyes has been doing a great job in mainly 5 sectors: the interception of goalkeepers which are 40.88% better than the average teams, goal creating actions, goal against by goalkeeper, crosses stop, and post-shot exp. goals per shots on targets.

Based on the historical data of Troyes matches in the current season and the previous season, the ball possession performance of Troyes is lacking. Out of a total of **47** match history, only in **6** matches Troyes has better possession of the ball than the opponent team.

### Factors That Significantly Affect The Match Outcome of Troyes

We identified 5 sectors that significantly affect the Troyes's match outcome. In fact, based on statistical tests, currently **Ball Possession has no significant effect on the outcome** of the Troyes match. Whereas in general it can be seen that Troyes is lacking ball possession compared to their opponents.

We used **statistical test** using **Logistic Regression** model to measure the most significant factors affecting Troyes's point in matches.

Factors that significantly affect the outcome of the Troyes match can be focused on increasing the chances of Troyes winning in the upcoming matches.

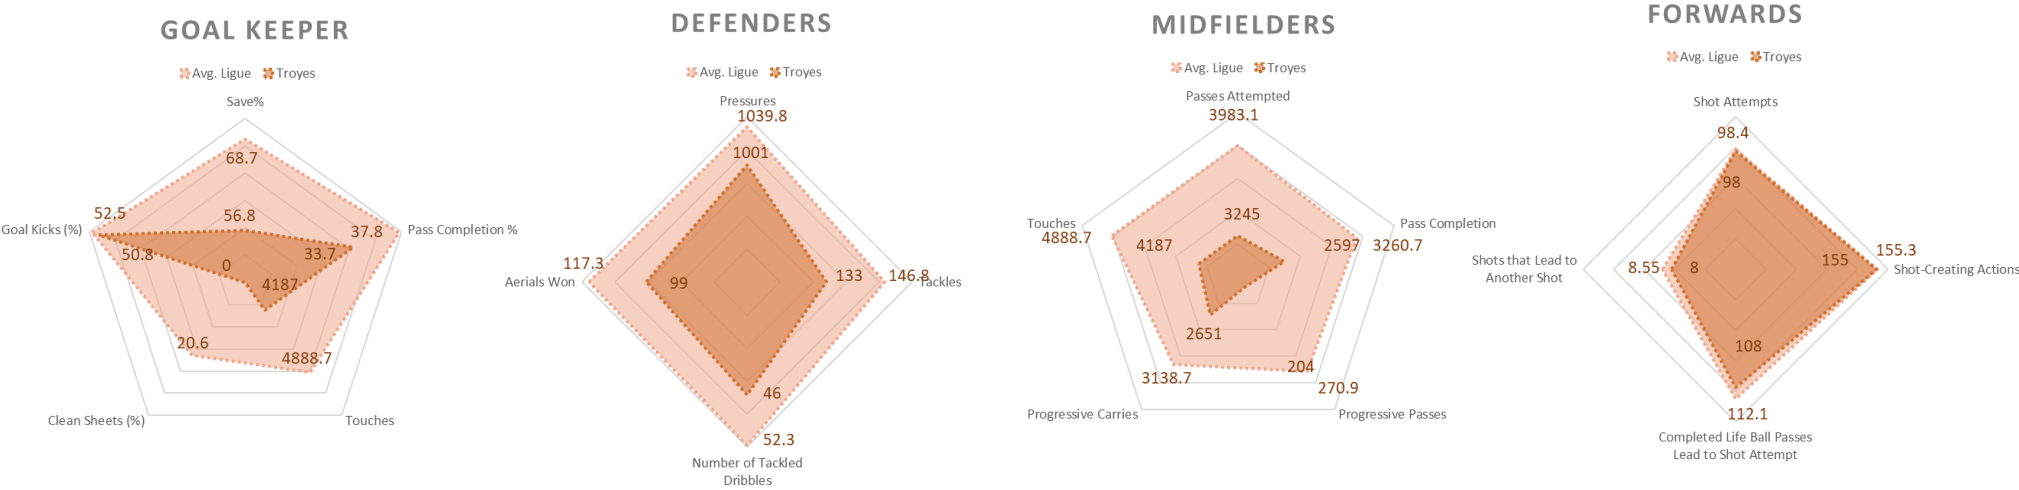

# What should be improved?

## Need extra works for the goalkeeper and midfielders

### Top 5 Troyes Weaknesses

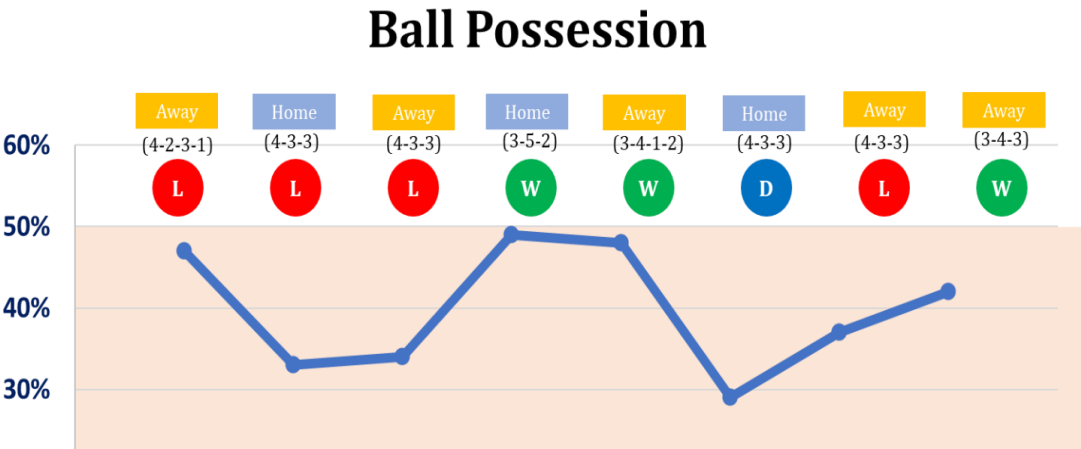

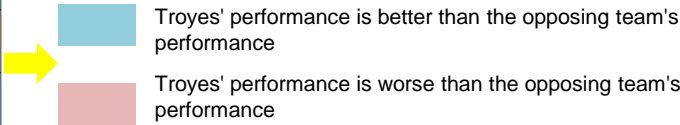

Actions	Players	Lack again Average Teams (%)
Clean Sheets	GK	-100.00
Progressive Passes	MF	-24.70
Pass Completion	MF	-20.35
Passes Attempted	MF	-18.53
Save	GK	-17.28

### Toyes' Ligue 1 Match History (2022-2023)

Match	Opponent	Ball Possession	Passing Accuracy	Shots On Target	Saves
week 1	Montpellier	Below	Below	Above	Below
week 2	Toulouse	Below	Below	Below	Below
week 3	Lyon	Below	Below	Below	Below
week 4	Angers	Below	Below	Above	Below
week 5	Monaco	Below	Above	Below	Below
week 6	Rennes	Below	Below	Below	Above
week 7	Lens	Below	Below	Above	Below
week 8	Clermont Foot	Below	Below	Above	Above

Compared to the average teams in Ligue 1 this season, Troyes has been lacking in mainly 5 sectors: the goalkeepers' cleansheet, which are left **100%** behind the averages, the midfielders jobs of progressive passes, pass completions, and pass attempted. Lastly, it was the goalkeepers' save that should be improved at least **17.28%** to match the average teams.

**100%**

Troyes always has lower ball possession than the opposing teams even though they won the game.

While forward players are quite okay and only left in the shots that lead to another shot, there are big room for improving the training for goalkeeper and midfielders.

Especially, our midfielders' touches, progressive carries, progressive passes, and pass completion are way below the standards.

In the majority of matches this season, our midfielders are left behind the standard average of other teams in Ligue 1.

Shots on targets and saves have been a priority to be improved from the players through extensive trainings.
